

Decision Control

Agenda

- ① Control Statements.
- ② if
- ③ if else
- ④ if elif else
- ⑤ single line if else

Control Statement

- ① decision control
- ② match case
- ③ Iterative control

keyword
↓

if

if condition:

≡
≡
≡

if
block

—

Write a program to check whether a given number is positive or non positive

```
x = int(input("Enter a number"))
```

```
if x > 0:
```

```
    print("Positive")
```

```
if x <= 0:
```

```
    print("Non Positive")
```

keyword
↓

if else

if condition :

≡
≡
≡

T

]

if
block

F

keyword → else :

≡
≡
≡

]

else
block

Write a program to check whether a given number is positive or non positive

```
x = int(input("Enter a number"))
```

```
if x > 0:
```

```
    print("Positive")
```

```
else:
```

```
    print("Non positive")
```

if elif else

elif = else if

if condition:

==

T

①

elif condition:

elif condition:

==

T

④

else:

==

←

⑤

Write a program to print grade obtained in a test. Take marks obtained from user and display the grade.

$90 < \text{marks} \leq 100$	A
$80 < \text{marks} \leq 90$	B
$70 < \text{marks} \leq 80$	C
$60 < \text{marks} \leq 70$	D
$50 \leq \text{marks} \leq 60$	E
below 50	F

Single line if else

Single line if else is an expression
but if else is not an expression

~~x =~~ if _ :
 ==
else:
 ==

x = code1 if condition else code2
x = code1

Write a python program to check whether a given number is positive or non positive.

```
x = int(input('Enter a number'))  
print("positive") if x > 0 else print("Non Positive")
```

Nested if else

if condition :

if condition :

else :

else :
